A high concentration formula for pre-conditioning soiled areas of wet cleanable upholstery fabrics. Fabric Prespray contains water soluble solvents, mild detergents and cleaning agents to help release soils before extraction cleaning and rinsing.
Light duty applications: Dilute 100ml of B148 per litre of warm water (1 to 10).
General and heavy duty: Dilute 330ml of B148 per litre of warm water (1 to 3). For body contact soils, hair oil and grease use B108 Fabric Restorer.
Always pretest fabric for colour fastness and possible texture change with diluted solution before proceeding. Do not use on water sensitive fabrics. Apply by hand spray applicator to all heavily soiled areas, then agitate with upholstery brush or blot with white towel. Extraction clean with B145 Fab Clean according to label directions, or extraction rinse with B109 Fibre & Fabric Rinse where pre-testing indicates a risk of colour bleed or browning.
