Product Description & Directions For Use:

A water-based anti-static treatment for carpets, fabrics and other surfaces. Shockaway will help prevent the build-up of static electricity on carpet fibres and other surfaces and is formulated to help prevent re-soiling on carpets. Shockaway should be used in conjunction with other measures such as increasing relative humidity, reducing heat and the use of anti-static mats or carpeting. Thoroughly vacuum carpet and extraction clean if required (not essential). Dilute 125ml B194 Shockaway per litre of water (1 to 8). Do not mix with other products. Always pre-test carpet for colour fastness and other surfaces for suitability with diluted solution before proceeding. Prohibit people and pets from the application area and wear a suitable dust mask to prevent the inhalation of spray droplets which may cause temporary irritation of the nose and throat. Apply diluted solution by spray applicator at low pressure (max 30psi / 2bar) at the rate of 5 litres of mixed solution per 50 square metres. Brush product into carpet with carpet pile brush, replace furniture on protective pads and allow carpet to dry completely before re-use.
